

USE 777 MIRACLE FINISH

The C.P.R. used 777 Miracle Finishes exclusively in finishing their new Hotel at Lake Louise, and have placed their order for the same finishes for their new Banff Hotel. Why were the 777 Miracle Finishes chosen? The C.P.R. could not afford to have inferior products in these high grade hotels which would necessitate refinishing at short intervals.

After applying their own tests to the 777 Miracle Finishes they selected them exclusively over all others.

The new \$5,000,000.00 Hudson's Bay Company's Building in Winnipeg when completed will be finished throughout in 777 Miracle Finishes.

It is just as important when doing floors or furniture or cars that a high grade finish be used, so that they will withstand the extreme climatic conditions of this district.

On account of buying in quantity we are able to sell you these Finishes at a price similar to what has been charged, in many cases, for inferior products.

Proudfoot Nominated

Acadia U.F.A. Political Association held Convention in Oyen. Practically All U.F.A. Locals in Constituency Represented. About 80 Delegates and 120 visitors present.

Addresses at Night by Hon. Geo. Hoadley and William Irvine.

Lorne Proudfoot of Chinook was the unanimous choice of the Acadia U.F.A. Political Association delegates, as candidate to contest this riding in the provincial election to be held on June 28.

Practically every U.F.A. Local in the constituency was represented and a large number of visitors were present, when the convention opened shortly after 10 o'clock in the morning. During the afternoon session, an address was delivered by Hon. George Hoadley, Minister of Agriculture.

In the evening a public meeting presided over by Mr. J. P. Watson of Chinook, was addressed by William Irvine, ex-federal Labor member for Calgary, and Hon. George A. Hoadley. The meeting was well attended, and both speakers were well received.

An intensive election campaign is now being conducted throughout the province by the U.F.A.

Farm Young People's Week

The annual university week for farm young people will open June 4 at the Alberta University, when young people from many parts of the province will come to the University for a week of lectures and recreation. The lectures will cover many branches of agriculture and also domestic science and nursing. An interesting new feature of the event this year is the inauguration of a scholarship for the boys and girls attending the courses. The scholarship will consist of one term's instruction free of all charges, with board and room provided, at one of the agricultural schools in the province, for the boy and for the girl obtaining the highest standing during the week at the university.

Monday, June 28
Election Day

Monday, June 28, has been officially announced as provincial election day. There are 60 seats in the Legislature, and a very keen contest is anticipated. In the majority of ridings three-cornered struggles will be the order of the day. In the riding of Acadia, the contest is between Lorne Proudfoot, of Chinook, U. F. A. Dr. J. P. Kerr, Oyen, conservative, and George Campbell, Youngstown, liberal.

Third Fortnightly
Crop Report

Issued by Department of Agriculture
Edmonton, Alberta, May 26

Seeding of all grain crops in the province is now practically completed. A small amount of oats and barley seeding remains to be done, but the end of the month will see all crops in the ground (except green feed), which is considerably earlier than in former years.

Conditions continue to be generally satisfactory. The weather since last report has been showery, and most of the districts in the province have benefitted thereby. Precipitation for May to date has ranged from half an inch in most of the districts to nearly two inches in the Grande Prairie and Peace River territory. In the south-eastern district, there have been good local showers, but no general rains. Grass and winter rye are in need of rain, but other crops are looking well. There has been no further serious damage from soil drifting or from pests. Winter wheat has come through without loss.

In the south western district there has been some rain, and the grain crops have a good start, but dry conditions prevail generally and rain is needed over practically all of this section. Winter wheat is looking well and rye is headed out. In the more central and northern territory precipitation has been somewhat heavier, and all crops are showing good growth. Damage from cutworms, wire worms and grasshoppers has been reported to a small extent in certain limited areas, but generally speaking there appears to be no further fear from this quarter of serious interference with the growth of the crops.

In the irrigated areas in the south the first crop of alfalfa is approaching the harvest period and is in excellent condition. Thinning of sugar beets has commenced. All irrigation operations are proceeding briskly. Reports indicate that there has been considerable increase in grain acreage, particularly wheat, in certain localities, but the general increase throughout the province is not expected to be great.

Alberta Salt Wells

The salt wells at McMurray now being developed by the Alberta Salt Co., are producing 28 tons of salt daily. The supply is abundant, two seams ranging in thickness from 120 to 150 feet now being mined, at a depth of from 950 to 800 feet.

SUMMER GOODS

We are showing an extensive line of Summer Goods for both Ladies and Gents. Be sure and look our stock over.

We are showing many shades in Ladies Silk Hose. These are made by Penman's and are exceptional value, at per pair \$1.50

ASSORTED JAMS

Canadian made pure Strawberry Jam is very scarce. We anticipated our wants and are able to offer pure Strawberry Jam in Hamsterly farm brand 4 lb tins, at 1.10

Jam in glasses is very popular. We have a good assortment just in comprising, Cherry, Black Currant, Strawberry, Pineapple Marmalade Orange and Bramble Jelly.

Stores closed each Wednesday afternoon during June and July, except Wednesday, June 30.

WORLD HAPPENINGS
BRIEFLY TOLD

The City of New York generates and uses about 10 per cent. of all electric energy generated in U. S.

Covered by the three used on American railroad engines are being introduced on automobiles in London as a safety device.

After being published continuously for just over 21 years, the Red Deer News has ceased publication. It was sold to the Red Deer Advocate.

Out of a population of over 30,000, only 1,500 residents of Sakahoon will be liable to pay city taxes this year.

A liberty bell made of 20,000 electric lamps, and as tall as a six-story building, is to be a feature of Philadelphia Sesqui-Centennial.

Had a severe, hallow been taken among the miners' wives, says Emmeline Pankhurst, writing in The London Sunday Express, the miners' strike would never have been called.

The Canadian Club of New York has a total membership of 1,300 and has increased at the rate of one member per day during the last three months.

Women and girls in the West Ham Guardians' Central Home, London, Eng., detained under the provisions of the Lascary Act, are to be allowed to visit the local cinema once a week, at the expense of the guardians.

One hundred dead and more than 200 injured have been removed from the mass of mud, lava and rocks precipitated by the eruption of a volcano in Tokachi province, Hokkaido Island, Japan.

John H. Fox, deputy receiver of taxes at Long Island City, has installed four four-gas guns aimed at the alarm. Cashiers can release the tear gas by stepping on knobs on the floor. Receipts of taxes at the office at times amount to \$100,000 in a day.

Mexican bandits have captured two Americans and are holding them in Mexico for a ransom of 6,000 pesos, according to advices received from the American consul at Torreon. C. C. Braden, a mining engineer, and a man named Gallagher are the men held.

Next Generation Taller

By Nutrition Experts

Sons will outstrip their fathers in height and weight, and daughters will top their mothers by a generous inch or two in the options of two nutrition experts who attended the national health congress at Atlantic City, N.Y.

"Longer and stronger bones are some of the results of correct nutrition that we are beginning to observe in children study, Miss Miriam Birdseye of the United States department of agriculture told the Associated Press.

"The gain of an inch in height and a corresponding gain in weight may be looked for in the next generation, because of our much better diet habits," said Dr. Samuel J. Crumline.

What Future Will Show

The Japanese empire has a population of over \$3,000,000. The growth is threequarters of a million a year. Japanese papers refer to the fact that Siberia, Mongolia, Manchuria, and South America are open to Japanese emigrants, but the United States and Australia are closed to them. The opinion is expressed that the future will show which is the stronger—natural law or man-made legislation.—Kingsland British Whig.

Walnut Is King Of Woods

Walnut appears to be the king in commercial hardwood lumber, measured in cord standards. This article is the only species of wood used generally for lumber that costs more than at any other time in its history.—Lumber Trade Journal.

W. N. U. 1631

German Professors
Discover New Star

Ten Million Years Old and Brighter Than Sun

A new star has been discovered, an unassuming star in the fourteenth magnitude, 1,000 times too faint to be seen with the naked eye, flashed up in a small spiral nebula which appears as big as a dime at a distance of 20 yards.

In reality, it is a star of 10 million times brighter than the sun, flashing up an island universe for about 10,000,000 light years. This means we are looking into the past of our distant cosmic universe, for the catastrophe which gave birth to this new star took place 10,000,000 years ago, long before the glacial period on earth.

New stars are not a very common occurrence in the sky. The last one appeared in May, 1925.

This last one was discovered at Heidelberg, Germany, by Professors Max Wolf and Reinhold. The good news was immediately wired to Copenhagen and thence to the Harvard observatory, the clearing house for astronomical news in America.

Telescopes all over the country were pointed at the nebula and soon the existence of the new star was confirmed on plates taken at Harvard.

The Orphan Colt

Advice As To Feeding Young Colts From Time of Birth

(Manitoba Agricultural College Note) Occasionally the mare dies at foaling time and there is no milk for her foal. This presents a rather serious problem, but one that can be dealt with successfully if patience, vigilance and common sense be the keynote of treatment. It is especially worth while to make every effort to feed foals. Statistics show that the rate of replacement is increased above what it has been during the past two years. The reason for this is that in North America a decided decline in our horse population. Raise the big side milk quality and this can only be done by good breeding and judicious feeding from colt-hood to maturity. The horse makes one-half of his weight during the first year of his life. The best substitute for mare's milk is milk from a cow and preferably from one yielding a low percentage of fat, according to Professor H. B. Sommerfield, Animal Husbandry Department, Manitoba Agricultural College.

To make a pound of sugar-sweetened water to dissolve in 2 to 3 tablespoons of lime water and enough fresh milk to make a pint. Feed about one-fourth pint every hour during the first few days, always warming to blood heat. A satisfactory method of feeding the foal is to use an ordinary nursing bottle with a large hole. Whatever utensil is used, it should be thoroughly cleaned and scalded before each meal. As the foal grows, the amount of feed should be gradually increased, the period between feedings lengthened and whole milk substituted. After a few days, six feedings a day by good breeding and judicious feeding from colt-hood to maturity. At three to four weeks of age, the use of sugar may be stopped, but it is well to continue the lime water. In five or six weeks, sweet skim milk may be gradually substituted for whole milk and after three months the colt may be given and all it will drink three times a day. The towels should be given more freely, but if scarce, give from 2 to 4 tablespoons of mixture of sweet oil and pure castor oil shaken up in milk, stopping the feeding of milk for two or three meals, allowing instead, only sweetened warm water with lime water added. At the earliest possible age, the foal should be fed solid food, such as crushed or whole oats, bran and a little lapsed oil meal and legume hay. For exercise, let the orphan have the run of a lot or grass paddock.

Farm Help In Demand

About four thousand men have been placed on Alberta farms this spring and the demand has not been fully met. Walter Stillman, commissioner of labor, reports.

"IDEAL FASHIONS" by J. B. F. F. F.

Smartly Correct

This season the two-piece frock rules over a wider domain than ever, and on many days, the hours of its reign extend from morning to evening. Therefore, must be practical, yet combine as well, a semi-formal charm for leisurely events. The model pictured here is a typical example of a sports costume that is smartly correct for either a morning of shopping, or an afternoon of bridge. The jumper shows a high, turn-down collar, joined to a vest with button trimming, and odd-shaped pocket pockets that support a narrow tie belt. It has long set-in sleeves gathered to deep cuffs at the wrists. The skirt, attached to a body lining, is box-plated at the front only. No 1261 in size 16, 18 and 20 years. Size 18 years requires 1 1/2 yards 36-inch plain material for skirt with 1/2 yard for bodice top; blouse requires 2 1/2 yards 36-inch figured material, and 1/2 yard plain contrasting. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Plan Jack Miner League of Canada

To Honor World Famous Naturalist and Conservationist

A movement for the honoring of Jack Miner, world famous conservationist and student of animal life, has been started by Exploring Club, an organization in every community of the Dominion of the Jack Miner League of Canada.

The object of the league is to interest more people in the study of natural history, plant life, reforestation and conservation of the wild bird life on the continent.

A bird sanctuary Mr. Miner conserved at his home in Essex County is known as the home where all birds may find shelter.

Canada's Coal Supply

The time is rapidly approaching when domestic fuel cannot be obtained from across the border whether Canadian or wish to import it or not. The country's interests demand that of that source of supply should be assured by the encouragement of the industry within our borders.—Mining Journal.

Some men admit that they are soft made, while there are others who blame it on their wives.

SUNDAY SCHOOL LESSON
JUNE 6

JACOB AND ESAU

Golden Text: He yielded to one another, tender-hearted, forgiving each other, even as God also in Christ for us gave you. Ephesians 4:32.

Lesson: Genesis 25:19-34; 26:1 to 28:5; 32:3 to 32:31.

Devotional Reading: Matthew 6:12.

Explanations and Comments

Jacob's Birth to Esau at Esau's Birth. 22, 14.—On his return journey to the land of his fathers (see the historical background), Jacob reached the spot he named Mahanaim in Esau's territory. He deemed it politic to acquaint Esau of his arrival. The brothers met about for this purpose, returned with the startling news that Esau himself was on his way to meet Jacob accompanied by four hundred men. Jacob was palestricken and good reason had to be so; naturally he thought that Esau was coming to avenge the wrong he had resolved at his brother's hands. Jacob was face to face with the consequences of his past.

"You never are done with a sin until it is out in the light and forgiven. Psycho-analysis may have what perceptions it will, it makes some things better; that a man can sin, that he can have a few qualms of conscience, that he can handle himself, doesn't get that he can thrust his sin down into the hold of his subconsciousness and shut the hatch on it and sail on; but if the things he is through with his sin, because he has been honest until it is forgiven, but there is terrific reality given to that fact now by science. You never are done with a sin until it is out in the light and forgiven." (Dr. Harry Emerson Fosdick.)

United States Sitting Tight

Debtors Nations Are Having Hard Time to Make Payments

Perhaps the most serious day in the world has been the day when the policy of Great Britain supporting the Napoleonic wars, by which enormous continental debts were cancelled, but in the meantime he is trying tight and the debtors nations are sitting tight to devise ways of making payments. They cannot pay in goods because of the United States tariff wall. To raise gold they must undersell U.S. men in oil markets, which is difficult. And if they sell, they must also buy in other markets, thus shorting out United States imports, which would not contribute to the policy on Uncle Sam's part.—Toronto Globe.

Sees Its First Automobile

Donaig Village Files Flags in Honor of Occasion

This little old-world hamlet in the county of Donaig is celebrating the appearance of the first automobile in its midst. In honor of the occasion all the residents hoisted flags.

There are numerous villages in the British islands which are still living peacefully in the days of long ago, unmarked or marked by outward show of modern progress, but comparatively few can boast of avoiding the march of the automobile.

Engine Driving Exciting

When driving a locomotive the engineer and the fireman have many more thrills than the public knows of. Motor cars, pedestrians, broken rails and stalled trains provide so much excitement for those in charge of the engine that investigation shows most men of the throttle go gray between the ages of thirty and forty.—New York Times.

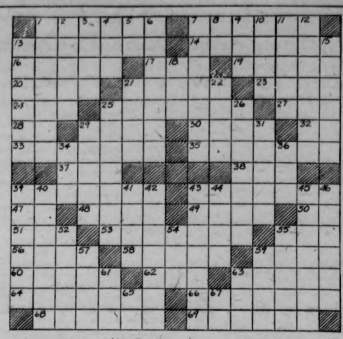

Fruit Growing in B.C.

Representatives of numerous working in the various fruit districts of Southern British Columbia, report splendid business for young stock during the spring months. The Coldstream Ranch, in the Vernon district, recently planted seventy acres in new fruit trees, and the industry is looking for the future of the fruit growing industry of this province.

Can Record Message
Sent To The Brain

Discovery Made By Professor Adrian of Cambridge University

By experimenting with the apparatus used in the reception of wireless messages, Dr. E. D. Adrian, F.R.S., of Cambridge University, England, has evolved an instrument which makes it possible to record the messages that travel along the nerve tracts in the brain.

The instrument has three tubes, an amplifier which magnifies the nerve messages 2,000 times, and a photographic plate. The tubes receive the messages as they would receive wireless waves. The nerve messages are recorded on the photographic plate in the form of dots and dashes.

Explaining his discovery, Dr. Adrian says: "If we touch the skin or prick it with a pin each nerve which is stimulated sends a message to the brain in the form of a series of small electric oscillations called nerve impulses."

"The impulses in each fibre are so small that until the advent of wireless it was impossible to detect them, although we knew that they were like from other lines of work. The tube amplifier has made it possible to magnify several thousand times, and the impulses can be recorded by a special instrument called a capillary electro-meter, which traces the electric changes on a photographic plate."

Answer to Last Week's Puzzle

Sir Henry Thornton Optimistic

On Paying Basis

Expecting C.N.R. Will Soon Be Placed In an address at the annual banquet of Canadian National employees at Toronto recently, Sir Henry Thornton, president of the system, said that before long, sooner than most people think, the National Railways will not only be self-sustaining, but will also render a profit to the public treasury. Sir Henry also commented on the growing regard in which the public was holding the service of the system and attributed the achievement of this goodwill to the loyalty of the employees.

New Class For Chicago Show

This year's International Show at Chicago, Nov. 27 to Dec. 4, will have a new class for swine carcasses of bacon type, the first of its kind for the big show. The management has also restored the class for Rambouillet weathers.

Alrapp experts predict that within ten years we may have 400-ton ships, each of which will carry 1,000 men, with equipment equal to ten cars of freight.

Issued by the Publicity Committee, Calgary

About Town and Country

John F. Miller, eye sight specialist of 401 Underwood Block, Calgary, will be at the hotel in Oyen on Saturday, June 12. Tell your neighbors he is better equipped than ever.

Mrs. J. G. Cunningham who was operated upon in Oyen General Hospital, ten days ago, was allowed to go home last Monday.

Mrs. John Ozust, who was operated upon in Oyen General Hospital last week, is reported to be making satisfactory progress.

Miss Luella Hagan, who was operated upon in Oyen General Hospital last week, is reported to be making satisfactory progress.

Mrs. H. C. Swartzlander, Sr., who left for Calgary last Saturday, is spending a few days in the city.

Mrs. F. C. McClean is spending the week in Calgary, attending the annual sitting of the Grand Lodge of the Eastern Star.

Mrs. F. E. Waldo was allowed to go home last week after spending a few days in hospital.

On Sunday, June 6, during the evening service at the United Church of Canada, Oyen, the Sacrament of Baptism will be administered to a number of children. Service commences at 7:30 p.m.

Dr. and Mrs. W. D. McPhail motored to Kerobert, Sask., last Thursday, returning to Oyen on Saturday.

Thos. Lee, J. Skinner, and E. D. Thygeson, left yesterday morning for Calgary, by motor.

Doris, the seven-year-old daughter of Mr. and Mrs. Wer. Hoover, was rushed to Oyen General Hospital on Sunday afternoon, when an emergency operation was performed. She is now reported to be doing nicely.

Mrs. S. A. Miller left yesterday to spend a few days in Calgary, where she will attend Eastern Star Chapter.

Mr. C. Riel, who was thrown from a buggy last week, sustaining a very bad fracture of the arm, was operated on last Monday morning when the bones were wired together with silver wire. His condition is reported as being satisfactory.

A welcome rainfall occurred last Sunday. Starting about 9 a.m. precipitation continued till about 5 p.m. when 38 inch was recorded on the gauge kept by Mr. W. V. Miller. This brings the rainfall for May to 1.08 inches, which is about half-an-inch in excess of the rainfall of May, last year.

Mrs. P. Watrin was admitted to hospital last Sunday evening and operated upon the following morning. She is reported to be making satisfactory progress.

Adjustments Will Remove the Cause of

NO KNIFE NO DRUGS
Consultations Free
Dr. JAMIESON, CHIROPRACTOR
Oyen, Wednesday and Thursday
Oyen, opposite Church of England

While the virtue of honesty is undoubtedly its own reward and possibly should not be paraded, we feel that a recent occurrence should not pass without mention. Last week the sum of fifty five dollars in bills was lost. The owner of the money discussed his loss with this paper, and it was felt that if found by an honest person to whom ownership could be proved, the money would be recovered. This attitude was justified. An advertisement, describing the loss was inserted in last week's issue of the News and within two hours of the paper being in the mails, the money was returned.

Sam Bowen, who recently had the misfortune to break his foot while working with a sledge hammer, is able to get round with the aid of crutches.

Mrs. Linfross of Bearville, who was admitted to hospital last week, is reported to be improving.

TENDERS FOR SCHOOL HOUSE

School Tenders will be received by the Board of Trustees of Lawndale School District No. 2020 at the office of the Secretary-Treasurer on Monday June 15, 1926, for the erection of a one roomed frame school building after Plan Number A-1. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of tender should be enclosed with each tender as a guarantee that the bid will not necessarily be accepted.

J. G. Cunningham, Secretary-Treasurer, Excel, Alta. Nearest Station, Excel, eight and a half miles distant.

FOR SERVICE—The Percheron Station "Ben of Excel" (whose enrollment certificate is given below) will be for service at the farm of Mr. O. S. Peck, 24 miles N.W. of Oyen. "Enrollment certificate of Pure Percheron No. 728. The pedigree certificate of the Percheron Station "Ben of Excel" No. 11050 described as follows: Color, grey, Marks, blaze, little white on left hind heel, right hind foot white. Foal 4 May 12, 1925. Owned by H. G. Peck of Oyen, Alberta, and is hereby certified that the said stallion is recorded in the Canadian Live Stock Records or is registered in a stud book as recognized by the Canadian National Live Stock Records Board (or has been approved by the Minister as a pure bred stallion, as the case may be) and is allowed to stand for public service in the Province of Alberta, and is granted this certificate. Issued at Edmonton the 14th day of January, 1926. Signed George Headley, Minister of Agriculture. For further particulars, please apply to H. G. Peck, Oyen, Alberta.

Eucharistic Congress Chicago, June, 1926

The Greatest Event in the History of the Catholic Church in America

C.N. Rys. To Operate Special Trains From Western Canada

Of unusual importance to Roman Catholics is the 28th International Eucharistic Congress in Chicago, Ill., June 20th to 24th next.

The Church dignitaries are duly appreciative of the efforts made by the Canadian National Railways, who have arranged to operate special trains to and from the Congress, and have also made reservations for several hundred people in good hotels at a reasonable expense, and ask their people to make application promptly for the necessary sleeping car and hotel accommodation. The Church authorities were consulted prior to arranging the train service so that the proper departure time from the various centres would be ensured.

Those who desire to use the regular service have the privilege of travelling on the through train which is operated during the summer season from Western Canada to Chicago.

Any agent of the Canadian National Railways will be pleased to give you further particulars and complete all arrangements.
